

# **Weekly Report for 2015/09/21-2015/09/27**

**Guo Fangzhou**

## **Progress**

### **1. TCPTree Project**

### **2. Revise vis 2015 submission**

This week I focused on Lintao's paper.

Currently, abstract, introduction, and related work are finished.

I will start to write the remaining part of the paper the next Monday.

The most serious problem of this paper is lack of novelty in visual design. Views used in the system are too trivial, I'm trying to find a way to make at least one or two views non-trivial.

Prof. Wu helped me a lot in the abstract and the title, he told me that I can write the introduction following the abstract written by him. And I have revised the introduction under his idea.

### **3. Large Graph Visualization**

## **Plan**

### **1. TCPTree Project**

### **2. Revise vis2015 submission**

Finish the draft

### **3. Large Graph**
